

Graphing on the Coordinate Plane
Emphasis on Quadratic Functions

Graph each of the following Quadratic Functions:

1. $f(x) = x^2 + 4x - 3$

2. $f(x) = -5x^2 - 10x + 6$

3. $y = 3x^2$

4. $h(x) = -6x^2$

5. $f(x) = x^2 - 4x$

6. $g(x) = -x^2 - 3x + 4$

7. $f(x) = 3x^2 + 8x + 5$

8. $y = 2x^2 - 8x + 5$
